COTONEASTER PRAECOX

This is one of the hardiest Cotoneasters and went through 20 degrees below zero without any harm. It has large berries like cranberries which color up in the middle of August and remain on until very late Fall. It grows rather flat and makes an ideal plant to mix in with foundation plantings, especially around ranch type houses. It also makes an ideal low spreading hedge.

HYDRANGEA PETIOLARIS (TRUE)
(Climbing Hydrangea)

An attractive vine which does equally well in shade or sun. Its foliage is bold, clean and shrub-like and a rich dark green color. Short spur branches are topped with white, fragrant, Hydrangea-like blooms during the summer and lasts for a considerable period. Climbing Hydrangea is one of the finest and choicest vines grown. It clings by rootlets to walls and trees without support and can be planted against rocks for a cover.
